

Notice of Oral *Ex Parte* Presentation

May 2, 2005

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
445 12th Street, S.W.
Washington, DC 20554

Re: In the Matter of Modification of Parts 2 and 15 of the Commission's
Rules for Unlicensed Devices and Equipment Approval, ET Docket No.
03-201

Dear Ms. Dortch:

On April 28, 2005, Jeffrey Schiffer, Chris Rogers, and Marjorie Dickman of Intel Corporation met with Ed Thomas, Bruce Franca, Julius Knapp, Alan Scrimgeour, Geraldine Matise, John Reed, Hugh Van Tuyl, Rashmi Doshi, William Hurst, Richard Fabina, Steven Dayhoff, and Kwok Chan of the Office of Engineering and Technology regarding the above proceeding.

In the course of this meeting, Mr. Schiffer clarified various issues surrounding the implementation of a partitioned radio transceiver module system, including (i) the effects of various lengths of interconnecting cable between the module components; (ii) the effects of mounting the crystal outside of the shielded module; (iii) the effects of the change in lead length to the crystal; (iv) the use of various protection methods for the firmware; (v) how the module components would authenticate themselves; and (vi) the various ways the FCC grant process could be utilized to limit the application class for which the partitioned modules can be used. Mr. Schiffer emphasized that the partitioned architecture for radio transceiver modules allows a portion of a radio to be integrated into a host platform, while still taking

advantage of the significant time and cost savings of the module approval process.

Pursuant to Section 1.1206 of the Commission's Rules, 47 C.F.R. § 1.1206, a copy of this letter is being provided to the abovementioned parties. Please contact the undersigned with any questions in connection with this filing.

Respectfully submitted,

/s/ Marjorie J. Dickman

Marjorie J. Dickman
Senior Attorney, Government Affairs
Intel Corporation
